PLAN FOR THE CHILD'S EARLY CHILDHOOD EDUCATION

ATTACHMENT 1. THIS IS WHAT I'M LIKE!

This page is filled in at home together with the parents

I am...

I become happy
when...

I become sad when...

When I'm annoyed or
disappointed...

I like...

I don't like...

I want to learn to...

I'm good at...

The child's early childhood education plan is made together with the child, guardian and early childhood education educator. Goals set for the pedagogic activities in early childhood education are registered in the plan.

- The viewpoint of including the child and family is essential in early childhood education at the City of Kerava.
- This "This is what I'm like" form has been drafted to support the making of the early childhood education plan. If possible, the child completes this form at home with a parent before the child's early childhood education plan discussion. The parents fill in the form for a smaller child. The child fills in the paper form. Adults can fill in the form electronically.
- The child's description of themselves is utilised when making the child's early childhood education plan, in particular section 2.3.
- The child's assessment is attached to the child's early childhood education plan and stored on the City of Kerava's network drive in the day care centre group's own folder either in a scanned form or electronically as is or transcribed. In a private day care centre, the child's early childhood education plan and attachments are stored in a data secure place according to the private day care centre's storage practices, electronically if possible.
- The child's early childhood education plan is archived according to the archival instructions (*group letter 40/2019*) for documents created in early childhood education at the City of Kerava. If necessary when, for example, a child moves to a different municipality, data is transferred according to the City of Kerava's data transfer practices for early childhood education (*group letter 15/2019*). The guardian's consent is not needed when transferring data internally within the City of Kerava. It's allowed to transfer data internally within the organisation of the City of Kerava without a separate data transfer permission within the framework of the legislation (*group letter 15/2019*). In a private day care centre, the child's early childhood education plan is archived according to the day care centre's archival practices.
